

THEO GUEGAN

theo.guegan.perso@gmail.com | theguega.github.io/me/ | linkedin.com/in/guegan-theo | github.com/theguega

SKILLS

Robotics & Control: ROS2, dora-rs, RTOS, Behavior Trees, IK Control, MPC

AI & ML: VLAs, Vision models, Reinforcement Learning, Imitation Learning, PyTorch, JAX.

Languages: Python 3.13, Rust, C, C++17, MATLAB, Lua, Bash

Simulation & Tools: MuJoCo, Isaac Sim, Genesis, Gazebo, Docker, CMake, Git, CI/CD

EXPERIENCE

Machine Learning Intern

Feb 2026 – Present

Stealth Startup

Palo Alto, CA

- CEO: Claire Delaunay
- Training and evaluating VLAs and vision models for robotics control.
- Developing agentic frameworks for robotics
- Deploying end-to-end infrastructure : data-collection, simulation, networking, videos
- More public information soon..

Embedded Drone Software Engineer Intern

Sep 2024 – Feb 2025

Thales Land & Air Systems

Vélizy-Villacoublay, France

- Architected a real-time embedded Lua scripting engine in C++ (TDD), enabling rapid mission prototyping.
- Streamlined build processes for embedded Linux targets, ensuring reliable deployment in messy real-world conditions.
- Integrated local LLMs via Rust/Docker, handling hardware constraints and demonstrating ownership of the full software stack.
- Developed a cross-platform drone manager application with multi-drone support and control.

Autonomous Vehicle Control Lead

Feb 2024 – Jun 2025

UTonome – UTAC Challenge

Compiègne, France

- Led the deployment of control software from simulation to Renault Zoe (ROS/Python), validating algorithms in real-world track scenarios.
- Designed a homogeneous waypoint-based control law with (99% sim safety).
- Deployed Adaptive Cruise Control, Static obstacle avoidance and navigation algorithms based on the same control law with dynamic dispatch.
- Won 2025 and 2024 UTAC edition.

HACKATHONS - PROJECTS

Projects

- SO-ARM experiments, some OSS tools, neural MPC approximation, reachy mini, all under:
- <https://www.theguega.github.io/me>

Hackathons - Competitions

- UTAC Autonomous vehicle challenge (France) : best school award 2024 | won 2025 edition
- FIT Coding Challenge 2025 (Bosnia)
- UTC x st2i hackathon (France) : winners
- SWARM, The World's Largest Swarm Robotics Hackathon (Canada)
- Mistral AI Worldwide Hackathon 2026: build the next era of AI (San Francisco)
- Seed 2026 Embodied AI Hackathon in Santa Clara : won 2nd prize
- RoboHacks : NASA, Deepmind, YC (San Francisco)

EDUCATION

Université de Technologie de Compiègne (UTC)

Compiègne, France

M.Sc. Computer Science, Embedded & Autonomous Systems

Sep 2021 – Jun 2026

- GPA: 5.0/5.0 | Robotics Control, Embedded Systems, Kinematics

University of Waterloo

Waterloo, Canada

Computer Engineering, AI/ML

Sep 2025 – Dec 2025

- GPA : 4.0/4.04 | Deep Learning (Bryan Tripp), ML (Terrence C. Stewart), Image Processing, Computer Networks
